EDUCATION

Drexel University – Pennoni Honors College

Philadelphia, PA

Bachelor of Science in Computer Science; Minor in Artificial Intelligence & Learning

Sep. 2025 – Jun. 2030

- **GPA:** 3.90/4.00
- **Honors:** Presidential Scholarship; Dean's List (Fall, Winter, and Spring 2025–26)
- **Relevant Coursework:** Computer Programming I & II, Multivariate Calculus, Linear Algebra

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks & Libraries: React, Next.js, FastAPI, Express.js, Scikit-Learn, Pandas, NumPy, Prisma

Tools & Databases: Git, GitHub, PostgreSQL, Supabase, Firebase, AWS

Concepts: Data Structures & Algorithms, REST APIs, Machine Learning, NLP, OOP

EXPERIENCE

Co-Founder, Novus | *React, TypeScript, Supabase, Llama 3.3 70B*

Apr. 2026 – Present

B2B fintech platform for structured finance interview preparation.

- Architected a multi-tenant platform using React, TypeScript, and Supabase with RLS-based university isolation, student and admin roles, and cohort-level data access.
- Built an AI-powered practice grading system using Llama 3.3 70B and Supabase Edge Functions to evaluate structured finance responses across technical accuracy, risk awareness, and communication.
- Developed portfolio simulation and stress-testing tools across 5 macroeconomic scenarios with factor attribution and a 6-dimension risk scorecard.

PROJECTS

MarketPulse | *Python, Scikit-Learn, FastAPI, Groq API, NewsAPI*

Feb. 2026 – Jul. 2026

Full-stack stock forecasting app combining machine learning with live news sentiment.

- Trained a 300-tree Random Forest on 1,200+ daily records across 27 engineered features; used a temporal 80/20 split to prevent data leakage, achieving a \$2.08 holdout MAE versus a \$2.45 naive baseline — a 15% error reduction.
- Integrated live headlines through NewsAPI and scored sentiment and relevance with an LLM to create a relevance-weighted signal used alongside historical market features.
- Built FastAPI prediction endpoints, an in-memory rate limiter, and a pytest suite with 15+ cases covering temporal splitting, API behavior, and edge cases.

Sixth & Market | *React, TypeScript, Express.js, Firebase, Groq API, Leaflet*

Apr. 2026

Civic AI platform for Philadelphia 311 reporting and broadband accessibility.

- Built a full-stack civic platform that uses LLMs to categorize and improve Philadelphia 311 reports, with an Express.js proxy securing all server-side AI requests.
- Engineered a broadband dead-zone detection system combining FCC Broadband Map data, U.S. Census demographic signals, and Firebase complaint density into an interactive Leaflet risk map.
- Placed top 10 among 40+ teams at Philly Codefest 2026; served as the sole full-stack engineer across the React frontend and Express.js backend.

PrepGo | *Next.js, TypeScript, React, PostgreSQL, Neon*

Jan. 2026 – Mar. 2026

Full-stack SAT preparation platform built collaboratively by a three-person team.

- Built and deployed an SAT preparation platform used by 30+ users across 250+ reading and math questions within a three-person development team.
- Developed custom authentication and an XP-based progression system to track student progress and encourage continued engagement.
- Built the full-stack application with Next.js, TypeScript, PostgreSQL, and Neon, working across the frontend, backend, and database layer.

LEADERSHIP & VOLUNTEERING

Youth Co-Coordinator

Sep. 2025 – Present

Bochasanvasi Shri Akshar Purushottam Sanstha

- Co-lead a team of 15 volunteers organizing weekly youth programs and community events for 40+ participants.
- Grew program attendance from 25 to 40+ participants by restructuring event formats and streamlining volunteer communication.
